What is Wiz ?

Wiz is a connected lighting system. Wiz lights are set-up through your Wi-Fi network and can be controlled with the Wiz application on your iOS or Android phone and tablet, with the Wizmote remote control or with your traditional power switch thanks to the Wizclick feature.

Additionally, you can schedule the behavior of your lights, for example to follow your routines or to simulate presence.

ALWAYS THE RIGHT MOOD

ALL IN THE FAMILY

SAY THE MAGIC WORD

You can also now use Amazon Alexa or Google Home to control your lights with the power of your voice. Voice control is a new feature allowing you to connect your Amazon Echo or Google Home devices to your WiZ home, and simply speak to control your lights.

By recently interfacing with IFTTT you can now connect tons of features to your lights, such as the GPS of your phone, your favorite Weather app, or any other IFTTT connected device.
